Finding Movers	Packing	Scheduling	To-Do list	What to expect	Finances
spoke to a few friends for some of my friends Reliable movers some of my friends	I think that was just my first time, hopefully next time I'll do a little bit better. My stress level was at Nine and a half possible. unpack as quickly as possible.	TIME consuming to plan everything Packed for two hours every day everything really early just to make sure	fixing & painting internet transferred, it all had to be done (my son studies from home, I work from home) dismantle the large items	Over-charging We still had to wait atleast one an hour for the UHaul We were Tired	super expensive to pay for insurance, maintenance hydro

I just Googled it We did give them a really good idea of all the furniture we had. Next time I'll maybe hire movers so that they can coordinate everything	Better labeling was needed! furniture can go and we had already planned all that out Our personal stuff in a bag	It took almost a week to find our movers I've taken a couple of days off	we ended up with extra boxes Donating unwanted stuff Last minute packing my desk stuff	They were really late snafu with picking up our keys six days unpacking	Definitely, it was expensive

It did cost us a lot that went over affordable movers Decent reviews & we hired proper professional moving company the damages were nil actually	boxes started to get more random!!! We did label things very general like books, shoes, my name puts things generally where they would go in terms of the labels	packing took longer than expected time crunch / rush planning for the move Like two months in advance	Booked a UHaul truck at our building Ourselves book an elevator at our building bell to be here on the same day, which was done about I think 20 days in advance.	We had underestimated the amount of stuff we had They had to repack certain items for safety reason It took them much longer than expected.	we ate breakfast out

But next time I move I definitely will use I think a moving service. I would consider myself pretty tech savvy	Cautious Packing Cardboard boxes from neighbours (used-Recycle) making sure furniture is the right measurement	The move took us three months Stress level started at 5, the closer we got the higher it got probably close to 10 before leaving, I took few minutes at the end to to remember and like be emotional.	Selling stuff on kijiji Coordinating the Wifi Connection to be ready (we work from home) Be more proactive planning would have been much better like especially with like food	There's always anxiety. When will this be done? You're tired? On the day of the move the agent stopped picking up But next time, I will definitely use moving company up	We ate out

whole experience of finding a spoke to a few of mover was definitely not a trade because they lacked information Googled he spoke to a few of three moving companies in the area.	Labelling with just a sharpie way so that they wouldn't break pack things in a way so that they and the packing on the boxes was planned	Long days packing didn't sleep for two three days, packing goodbye	Deep cleaning setting the time for returning the rental truck Excell sheet - To-Do list	the elevator wasn't prepared, just weren't aware I would consider maybe not sleeping here the first day next time staying in a hotel would have been more more nice for us	I would clarify info so theycan quote more accurately

the moving company is extremely important. Two weeks or three weeks off Like research what the neighborhood is like	we had like a little suitcase for our personal things Better organisation & probably harder than unpacking packing was was probably harder than unpacking	- planning for the moving day Created a back schedule Didn't want to lose the time window for the elevator & parking	booked cleaners before the move Prioritising I'm pretty good at little details.	Stressful timeline loading took a lot longer than we thought - be mentally prepared for the move to be stressful and not get too stressed when things don't go as planned Nesreen Hajjar

- finding a trustworthy moving company I went through loads of Google reviews It was pretty misleading & stressful Nesreen Hajjar Nesreen Hajjar Nesreen Hajjar	the ones that were more miscellaneous were also the stuff that we needed to unpack first Nesreen Hajjar Room by room. sector, putting things in as the boxes were being filled, Nesreen Hajjar Room by room. sector, putting was boxed and marked, were being filled, Nesreen Hajjar	l would consider myself pretty tech savvy	one person would be like unloading the truck & the other will throw everything into the condo Nesreen Hajjar We just bought pizza My parents helped Nesreen Hajjar	I would just take it a little bit slower. Remember to relax We were be able to ask questions when when we needed (facebook) Nesreen Hajjar Nesreen Hajjar Nesreen Hajjar	
	didn't do a good job labeling, we didn't know where are certain items! YouTube for how to pack / shrink wrap			used a dolly at our building
